## Summary

Passionate and results-driven **Full Stack Developer** with hands-on experience in building scalable and responsive web applications. Proficient in front-end and back-end development using technologies such as **ReactJS, NodeJS, ExpressJS, MongoDB, HTML, CSS, JavaScript, and SQL**. Adept at integrating third-party services, optimizing user experiences, and ensuring cross-functional team collaboration. Strong problem-solving skills with a focus on writing clean, maintainable code. Currently seeking a challenging **Full Stack Developer** position to apply my technical skills and contribute to building innovative solutions.

## Projects

**Kisan** (*Visit Kisan*) | *ReactJS, NodeJS, ExpressJS, MongoDB, OpenAI* **Oct 2024 – Dec 2024**

- Developed a platform for Indian farmers to receive personalized crop recommendations, real-time market trends, and weather updates, improving access to critical agricultural insights. Integrated AI-powered chatbot and multilingual support, enhancing accessibility for diverse user groups and enabling informed decision-making. Recommended sustainable farming practices, improving crop yields and resource management for a pilot group of local farmers.

**Art Asta** (*Visit Art Asta*) | *HTML, CSS, JavaScript, Firebase* **May 2024 – Aug 2024**

- Built an online auction platform for artists to showcase and sell their work, encouraging engagement through competitive bidding and personalized profiles. Introduced "art on demand" functionality, enabling seamless collaboration between artists and clients for custom artwork requests. Improved the user interface and navigation, enhancing overall user experience and leading to increased engagement and positive feedback from early users.

## Relevant Coursework

- |                        |                          |   |                                 |
|------------------------|--------------------------|---|---------------------------------|
| • Web Development      | • DevOps                 | • Frontend Frameworks (React, Next)       | • Containerization (Docker)     |
| • Software Development | • API Development        | • Backend Technologies (Node.js, MongoDB) | • Agile Methodologies           |
| • Cloud Computing      | • Mobile App Development |   | • Version Control (Git, GitHub) |

## Technical Skills

**Programming Languages:** Java, HTML/CSS, JavaScript, SQL

**Developer Tools:** Visual Studio Code, Eclipse, Google Cloud Platform, Android Studio, Xcode

**Technologies & Frameworks:** Linux, GitHub, WordPress

## Achievements

**Hackathon Experience (nwHacks 2025):** Participated in my first hackathon, sponsored by major companies such as **TELUS, 1Password, Deloitte, Major League Hacking, and Scalar**. Co-created a platform that enables users to list services they can offer and connect with others to utilize those services. The project focused on fostering community collaboration and accessibility, enhancing my coding, problem-solving, and teamwork skills while igniting my passion for software development.

## Education

### Langara College

*Post-Degree Diploma: Mobile and Web Applications (Developer)*

**Jan 2024 – Apr 2025**

*Vancouver, British Columbia*

### Nagpur University

*Bachelor of Computer Application*

**May 2018 – Oct 2021**

*Nagpur, Maharashtra*

## Certifications

**JavaScript Essential Training, React Essential Training**

**Aug 2024**

*LinkedIn Learning*

**Learning MongoDB, DevOps Foundations**

**Sep 2024**

*LinkedIn Learning*

**Java Programming, SQL Essential Training**

**Nov 2024**
